

FANTASY TAN AIRBRUSH TANNING CARE SHEET

PRE -TAN PREPARATION

FOR THE HEALTHIEST TAN, START WITH THE HEALTHIEST SKIN.

Exfoliate your skin the night before. This promotes an even coverage and lengthens the duration of your tan by removing dead skin that would otherwise flake off. However, do not injure the skin by overdoing it.

Wax a minimum of 24 hours before your tanning appointment.

OR

Shave 8 hours before or after post tanning shower. Use a sharp, clean razor, with a lubricating product (such as hair conditioner, which should be rinsed off).

Remove or avoid wearing make-up and moisturizer as this acts as a barrier to the spray and stops the process from working properly.

Wear dark, loose fitting clothing and undergarments to your tanning appointment. The cosmetic bronzer may rub off on clothing. It will wash out of most fabrics but may stain nylons, lycra and silks.

MAINTAINING YOUR FANTASY TAN

FOR THE MOST BEAUTIFUL, LONGEST LASTING TAN DEVELOP A HEALTHY SKIN REGIMEN.

Wait at least 8 to 12 hours before washing.

Apply moisturizer morning and evening after your post-tan shower. Avoid moisturizers with AHA (Alpha Hydroxy Acid) because they promote exfoliation.

Avoid long, hot showers and baths, and scrubbing the skin. If you use a wash cloth when bathing, choose one that is as soft as possible. Pat your skin dry after bathing or showering. Excessive friction on the skin may fade your tan prematurely.

Chlorine in swimming pools and hot tubs can remove or shorten the longevity of your tan.

Take care when exercising as friction and excess sweat may cause your tan to fade prematurely or unevenly.
